

LAB 7

NAME: JABER-UL HUDA

STUDENT ID: 101137524

TEAM MEMBER: HASAN AL-HASOO

STUDENT ID: 101196381

TEAM MEMBER: KAIF ALI

STUDENT ID: 101180909

TEAM MEMBER: COLIN MANDEVILLE

STUDENT ID: 101180909

What we have done and learned on this lab:

- Configure two TimerA type timers and set timers to have the appropriate clock and set TimerA0 in UP mode (and corresponding interrupts) to trigger the RED LED and TimerA1 in UP/DOWN mode (and corresponding interrupts) to trigger the RGB LED.
- Config the Interrupt handlers of the Timers so they control the right LED from the two RGB and RED LEDs.
- Put the right CCR0 value on the timers so that the RGB LED blink (change to next color) every 0.5 seconds and the RED LED blink (on/off) every second.
- Use the appropriate handlers to make sure The two LEDs are out of phase by precisely 0.1 seconds.
