TEAM MEMBER: COLIN MANDEVILLE

STUDENT ID: 101180909

What we have done and learned on this lab:

- Create 3 tasks that have precise execution times using one timer per task using timers A1, A2, A3.
- Config timers so that Task 1 is 1 second, for Task 2 is 10 seconds and for Task 3 is 3 seconds.
- Set the RGB LED to a specific color per task. So we can easily verify whenever a task finishes execution by looking at the LED
- Add logic in the scheduler that mimics tasks' arrival times (T1 at 3 seconds, T2 at 0 seconds, T3 at 1 second). This behavior is repeated every 15 second.
